Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 557 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 557 day(s).

DATE MAILED: 10/01/2003

Notice of Fee Increase on October 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2003. See Revision of Patent Fees for Fiscal Year 2004; Final Rule, 68 Fed. Reg. 41532, 41533, 41534 (July 14, 2003).

The current fee schedule is accessible from (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2003 (or mailed with a certificate of mailing on or after October 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2003, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
- By a small entity (Sec. 1.27(a))..... \$665.00
 - By other than a small entity..... \$1,330.00
- (b) Issue fee for issuing a design patent:
- By a small entity (Sec. 1.27(a))..... \$240.00
 - By other than a small entity..... \$480.00
- (c) Issue fee for issuing a plant patent:
- By a small entity (Sec. 1.27(a))..... \$320.00
 - By other than a small entity..... \$640.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER'S AMENDMENT

The specification has been informally amended as shown below:

In the drawings:

" diode 22 " is changed to -- diode 23 --.

In the specification:

" out " between of and a cloaked (page 7, line 5) is deleted. Also " 44through " is deleted (page 7, line 8) and -- 44 through --. Is inserted --.

In the claims:

Please delete " 10 " (claim 1, line 1).

Allowable Subject Matter

Claims 1 – 24 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: As specifically claimed, the art of record fail to teach, among other limitations, in combination, an improvement in a cloaked RFID tag having a tag which comprises a logic circuit coupled to said switch selectively allow communication of signals through said antenna during normal operation to allow output of a signal from said RFID tag through said antenna and to disable the output from said RFID during a cloaking period; and a receiving connection to said RFID tag so that command signals are continuously receivable notwithstanding cloaking of said RFID tag (claims 1 and 10), and also

disabling communication of data signals from said RFID tag through said antenna coupled to said RFID tag during cloaking of said RFID; and receiving command signals by said tag through said antenna during said cloaking. The term “ **cloaking** ”, as described in the claims, is a state where the RFID tag antenna is disconnected, thus, the tag appears less visible in the RF field (see paragraph bridging pages 7 and 8 in the specification).

The closest prior art (US 6,072,383) discloses an RFID Tag having parallel resonant circuit for magnetically decoupling tag from its environment, which comprises a switch S1 that may be selectively moved between the open position and the closed position, in accordance with a stored data pattern to tune and detune the antenna circuit, such that the stored data is transmitted to the reader. In the switch closed position, which is the transponder state during modulation and during cloaking, the transponder is essentially removed from the environment. Such prior art fails to teach the claimed limitations as recited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gallagher, III et al (US Patent Number 6,072,383) discloses an RFID Tag having parallel resonant circuit for magnetically decoupling tag from its environment.

James R. Kruest (US patent Number 5,963,144) discloses a cloaking circuit for use in a radio frequency identification and method of cloaking RFID tags to increase interrogation reliability.
